

Wellis[®]

THE WORLD'S MOST ECO-FRIENDLY SPAS

The logo for 'Life 2023' features the word 'Life' in a bold, italicized sans-serif font. The letter 'L' is partially enclosed by a green circular graphic that resembles a globe with latitude and longitude lines. To the right of 'Life' is the year '2023' in a clean, sans-serif font.

EUROPE'S LEADING SPA MANUFACTURER
WELLISPA.COM

ABOUT US

Since our company's beginnings in 2003, the Wellis brand has steadily extended its reach throughout the world. The increasing demand for a healthy lifestyle has boosted the desire for quality wellness products. Thanks to continuous development and growth, Wellis has now become the largest hot tub manufacturer in the European market and already has a significant share in the American market. We produce hot tubs, swim spas, hot tub covers, and hot tub cabinets in a 320,000 sq. ft. state-of-the-art factory. The initial

construction and continuous expansion of our manufacturing facility equipped with modern production tools was motivated by the ever growing market demand and our pursuit of quality manufacturing technology. We currently sell 30,000 Wellis hot tubs per year at more than 1000 points of sale worldwide. We have been developing our new product line for more than three years. Our new models are the culmination of countless licenses, thousands of work hours, and ongoing innovation. To stay true to our mission, we aim to create products

that are both user-friendly and eco-conscious. It is increasingly important to us to pay close attention to the needs of our customers while also protecting the earth.

The primary goal of our company is to provide a better wellness experience for our customers, while also lessening energy consumption as much as possible. In these new models, buyers will see significant technological advancements as well as a renewed design.

"I was an active teenager; I traveled the world and was continuously on the hunt for new business opportunities. First, I worked on importing jeans from Asia, but I always wanted to learn and expand. Ultimately, my real success in business came when my brother and I started selling spas and together we created Wellis, Europe's leading hot tub company. In the beginning, we imported spas and hydromassage tubs as ready-made, pre-assembled products. The year 2010 became a gigantic milestone for Wellis and for us, as it was when we started manufacturing spas.

We started building the factory in the spring of 2008, and a few months later, the global financial crisis broke out. And then the great economic recession started. Everyone tried to talk me out of starting to manufacture hydromassage hot tubs in the middle of the crisis, as they absolutely count as luxury items. The opposition included the company's management. They also didn't endorse starting manufacturing, but I decided to go for it. To put it delicately, neither starting to make the products, nor introducing our own hot tubs to the European market was easy. Fortunately, our gamble worked out and

the rest is history. Our efforts were rewarded with much success and manufacturing products ended up pulling the company out of the crisis. As our next great leap, I suggested we try to expand into the American market – the native land of hot tubs. We have been growing our roots here and have been working to introduce the brand named Wellis to America. Parallel to expanding our business in the US, we would like to continue to grow overall. It is our passion to be on the cutting edge, but it's also an enormous responsibility!"

- Zsolt Czafik CEO and Akos Czafik CEO of Wellis Hungary

ECO-FRIENDLY ENERGY

SUSTAINABLE PRODUCTION TECHNOLOGY

Instead of being merely a long-term vision, a sustainable economy has become part of everyday life at Wellis. In the last few years, our company has placed increasing emphasis on the elements of an environmentally friendly and sustainable model.

Our efforts are based on two essential pillars: The first is to optimize our production process and the second is to educate our customers about energy and water-saving aspects, giving special consideration to environmental factors.

Here are some processes which were introduced into the daily life of our company:

- Recycling unnecessary substances with a special shredder.
- Producing ABS (Acrylonitrile butadiene styrene) from recycled plastic.
- Using low-consumption pumps in spas.
- Various developments in the name of renewable energy, like integrating solar systems into our processes.
- Shortening transport routes around the world and coordinating production and sales activities.
- New energy-efficient hot tub models.

SAVE THE RAINFOREST

We keep environmental awareness at the forefront of our minds during manufacturing. For instance, we eliminated the use of wood during production and replaced it with recycled materials. As such, we are protecting nature and staying mindful of the most effective recycling practices. At the same time, Wellis is also staying on top of technological innovations.

01

Energy Efficiency

QUALITY ASSURANCE

Wellis quality is continuously benchmarked against the highest German production standards under the TÜV Certification protocol that we subscribe to. This ensures we constantly meet and exceed all relevant international standards.

We are proud of this commitment to excellence and the clear differentiation from our market competitors that it affords us.

Our TÜV certificate guarantees that our products are of excellent quality and are

regularly and independently monitored to meet and exceed the highest manufacturing standards. The CE label on all of our products assures our customers that the design and build meet or exceed all relevant EU standards.

PRODUCT WARRANTY:

PEAKLIFE & SWIMLINE SERIES:

10 years on the shell structure of the spa

5 years on the cabinet of the spa

5 years on the control box and the display module

5 years no leak plumbing warranty

CITYLIFE:

10 years on the shell structure of the spa

3 years on the cabinet of the spa

3 years on the control box and the display module

3 years no leak plumbing warranty

THE RESULT OF 3 YEARS OF DEVELOPMENT

The Wellis R&D team has been working for 3 years on the new product portfolio, which is poised to revolutionize the hot tub industry.

61 patents are already registered in Europe and 14 in the US. Wellis also has a world patent for our electric water diverter. Our many

technology breakthroughs have resulted in energy-efficient and environment-friendly solutions.

**ENVIRONMENTAL
AWARENESS
AND ENERGY EFFICIENCY**

Our goal is to find energy efficient solutions while also focusing on sustainability and environmentally conscious production

technologies. It became obvious that our new and renewed products would also be produced by these standards. This is the reason our new

line was named Life. The name will be displayed by both our product families: PeakLife and CityLife.

NEW WATER DIVERTER:

WOW SYSTEM

Our improved electric water diverter replaces the large manual diverter. Our new device performs the same function and comes with a small control panel for ease of use. The electric water diverter makes for a gentler massage experience because after activation, the speed of the water increases gradually. Through automation, we've built a new massage experience into the hot tub. The gradual changing direction of the massage every five seconds, creates a pulsing effect, providing an even more invigorating feel than a traditional massage.

For the water current, we combined the massage strength of two older-model massage pumps in one by straightening

the pipes and installing the new water diverter. In this way, the consumption of energy while in use has been reduced to half the previous amount. Wellis' energy-efficient water diverter is patent registered in 152 countries. Compared to our competitor's solution, it has 23% higher pressure with approximately 30% less energy consumption. Moreover, we compared it to our previous models, and the results were that it has **75% higher** pressure with approximately **41% less** energy consumption

NEW SCANDINAVIAN INSULATION

All of our new spas incorporate an innovative Scandinavian insulation. In addition, 1.4" of **POLYFOAM** boards have been installed into the spa's framework, rather than fastening them to the cabinet. The **POLYFOAM** is fit specifically for each model and can be easily removed and reinstalled with ease.

The foam insulation under the rim has also been exchanged for an aesthetically pleasing 1.4" of **POLYFOAM** insulation.

In the ABS bottom pan, we have replaced the polyfoam with the best insulator we could find – Air. We achieved this by installing an ABS sheet 1.2" from the bottom plate, creating insulating pockets of air.

SMART-IN STEP SYSTEM

In Wellis spas, the heat pump can be stowed under the larger step. In doing so, the heat is maintained in a cost-efficient manner, without affecting the product's aesthetics. The Smart-In Step with built-in heat pump can heat or cool from 59°F up to 104°F, (saving up to 70-75% of heating energy). Inside the steps we also designed storage compartments. These handy areas are perfect for storing towels or chemicals, and there is also a compartment for charging cell phones (equipped with a USB hub).

SMARTPHONE APPLICATION

Control your spa from home or while you are on the road with the Wellis Smartphone™ app!

The app is available for both iPhone and Android smartphones.

Set the desired temperature and other functions from your phone before you head home so that, by the time you arrive, you have a heated, welcoming spa waiting for you. Your luxurious Wellis hydromassage is now available at the touch of a button.

02

Water Purity

WATER PURITY

All Wellis spas use a multi-stage filtration and sanitation system that ensures crystal clear, safe bathing water with minimum user input. The process starts with our special antimicrobial cartridge filters. The low-energy eco-circulation pump draws spa water through the filters where any tiny particles are then trapped. The antimicrobial coating then helps to eliminate any bacteria that may be attached to the filtered particles. This helps prevent any odors and bacteria growth from developing.

Once the spa water has been filtered, it passes through the heater and then the eco-circulation

pump. Next, it is passed through the sanitation device.

Although hot tub water can be kept safe with chemicals alone, an electronic sanitation device greatly reduces the amount of chemicals required, thereby improving the water quality for soakers. Every spa we make is fitted with the highly-efficient OZMIX™ water purification system.

CRYSTAL CLEAN SYSTEM

Thanks to the 2" diameter pipe, our motor circulates more water and does so faster, thus, filtering the water more rapidly. The new circulation jet has been designed to have 3 zones. Two of these zones direct the water downwards to stir up heavier debris that has settled in the footwell of the hot tub.

The third zone helps direct the flow toward the filtration system.

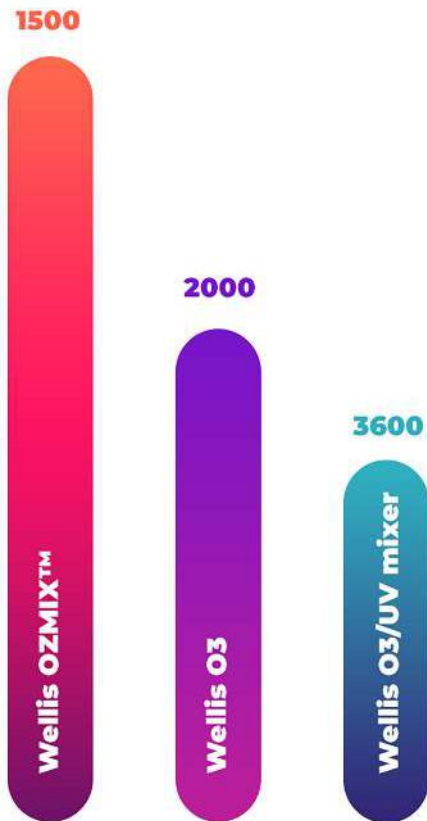

OZMIX™ SYSTEM

Disinfection efficiency can be increased by mixing ozone in the water. Tests have shown that the ozone systems we are using are the most efficient form of disinfection. To facilitate this process, we created the OZMIX™ system. This system has proven to be more effective than comparable disinfection systems with the addition of chlorine and a balanced pH.

Our goal is to achieve the best possible disinfection system while reducing the amount of chemicals that are currently needed for the safe use of a spa.

We tested the OZMIX™ system on all the bacterial strains associated with hot tub use and it performed better than all of the other disinfection systems. In tests, we found that the ozone + UVC system showed more than 4,000 units of bacterial colonies. That number was significantly reduced to 1,500 when evaluated with the OZMIX™ system in use.

IN-LINE WIS

- This useful, built-in accessory provides 24-hour monitoring of your spa water's quality status via your smartphone.
- The system also outlines the exact chemicals and dosages needed to maintain proper water balance.
- Since this is a built-in system, there is nothing to float around in your hot tub or need to be replaced. This feature has been specially developed by our Wellis team.
- You can download the WIS application from Google Play or the App Store.

03

Experience and Design

FUTURE OF DESIGN

LIGHTSIDE™ SPA CABINET

The wood grain-look finish of the cabinet and wide horizontal side and corner bars add an intimate atmosphere to the appearance of the Wellis lineup of spas. Cabinets are available in both gray and brown. Our new spa cabinet is sleek and aesthetically pleasing. An eye-catching LED strip runs along the side of the spa cabinet (PeakLife). Newly developed corner elements give a more modern and refined look to our new design.

NECK MASSAGE & HEADREST

The neck massage and headrest take your daily stress off your shoulders and neck with their advanced ergonomics and more comfortable design. The design of the headrest follows the line of the neck and head, creating a cradle so you can relax even more comfortably in our hot tubs.

FILTER HOUSING

Our custom-made filter housing has an outstanding design and complements the overall design of the hot tub. Filters can be replaced easily in one easy step.

WATERFALL

Sit under the cascading water and enjoy a soothing neck and shoulder massage. This blissful water feature is a new development for Wellis. There is no other product on the market like it.

INFINITY JET

We specially designed the 7" rotating infinity jet. This jet makes the experience even more enjoyable by massaging a larger portion of the body. Rather than just moving up and down, it draws a figure eight as it rotates.

WELLIS-CENTRIC LIGHTING

Wellis-Centric Lighting (WCL) is based on the belief that colors and colored lights can have a positive impact on a person's physical and mental health. Various scientific studies have shown a relationship between the human body and specific colors.

Green - Calming

Blue - Relaxing

White - Productivity

Purple - Enlightenment

Yellow - Energy

Red - Stimulating

Orange - Positivity

Pink - Healing

Indigo - Peaceful

IN.MIX COLOR THERAPY MOOD-LIGHTING

When connected to our SmartTouch control systems, in.mix transforms our touch screen into

a real lighting console with a perfectly designed interface. Create your personalized ambiance easily with an infinite selection of colors and a light intensity dimmer. In.mix can drive and control up to three light zones in or around your spa (inner, rim, cabinet). The color selection can be independently managed or synchronized to create stunning visual displays. In.mix comes with a built-in power supply and can be connected to your spa's control system. It can illuminate the water of your spa or create accent colors around it.

EVENLIGHT JETS

At Wellis, we came up with countless patents for our new models, one of which was for lighting jets. The jets illuminate not just themselves, but also the surface around them. The interior of the spa is sleek and modern in its appearance and is like sitting in a spaceship. There is nothing else like this on the hot tub market. The lighting jets not only give the spa a more modern appearance, but also a larger lighting surface.

EDGE LIGHTING

The Edge lighting is a separately controllable lighting and design element located under the accents, the cup holder, water features, and the filter housing. You can control them all at the same time. This lighting can differ from the color of the EvenLight jets.

LIGHTSIDE™ CABINET SYSTEM (PEAKLIFE)

The LightSide™ cabinet system appears in Wellis' new spas, which includes hidden lighting under the corner elements, and an in-house developed LED strip, which runs along the side cabinet of the hot tub. The light can be adjusted separately. The integrated LED strip gives a special atmosphere while relaxing.

WELL LIGHTING

All of our hot tub models include central underwater lighting, which lights the water of the entire spa.

WELLIS MASSAGE

RELAX MASSAGE SEAT

This seat targets the regeneration of the shoulder girdle and the longitudinal trunk muscle tissues, as well as the hip flexor muscles and the knee extensor muscles – the muscle groups most exposed to everyday strain.

EXPERT MASSAGE SEAT

This seat's adjustable jets offer physiological effects, with customized directional and strength control.

COOL DOWN MASSAGE SEAT

The armchair design provides relaxation after training. In addition to the physiological recovery offered, its overall calming effects are also significant.

FOCUS MASSAGE SEAT

This seat offers its user an experience similar to

the "Expert" effect, relaxing the longitudinal trunk muscle tissues, and passively activating the hip and thigh flexor and extensor muscle groups.

BODY FLOW MASSAGE SEAT

This is the massage seat with the most intensive physiological effect. In addition to affecting the trunk's muscle tissue, it also positively impacts venous and lymphatic circulation in the lower limbs, bringing relief to vein valves.

INTENSO MASSAGE SEAT

This is the most refreshing massage seat and is a favorite of professional athletes. Intenso is ideal for recovery after an intense training session, working the most critical areas, the back and leg muscles.

* The layout of the jets varies by model.

COLORS OF WELLIS

ACRYLIC COLORS

With our comprehensive range of beautiful contemporary acrylic shades, there is something to harmonize with any setting – indoor or out. Choose from: Sterling Silver, Tuscan Sun, or Midnight Canyon.

CABINET COLORS

No more sanding, oiling, and messy maintenance of a traditional timber cabinet. Our spa cabinets are made of a UV-resistant polymer material that looks as good as real wood, but is entirely maintenance free. PeakLife spas have the new

LightSide™ design cabinet paired with vertical corner elements, lending an elegance touch to the aesthetics. Cabinets are available in gray and brown.

CONTROL PANELS

SMARTTOUCH CONTROL PANEL (PEAKLIFE)

The control panel offers a full-featured keypad with color capacitive touchscreen display. Eliminating the need for physical buttons, keys, and overlays, our touchscreen keypad is fun to use, simple to operate, and features an intuitive and engaging one-level menu interface.

EASY 7 CONTROL PANEL (CITYLIFE)

The Wellis Easy 7 brings all the features you really

need to one keypad. Compact, with a large LCD display, the screen is bright enough to be seen throughout the day and simple enough to use in the middle of the night.

AUXILIARY CONTROL PANELS (PEAKLIFE) 2 PIECES

The single button is also an auxiliary keypad, designed to be installed as a second keypad on your spa. This feature allows you to activate the spa pump associated with its respective section.
